

A.D.S.'s Booster Heater Line

Hubbell Booster Heater J Model

This booster heater is designed to provide 180°F sanitizing water for your high-temp dishwashing machine. ASME stamped.

- ◆ Storage tank is constructed of type 304L stainless steel for long-term tank use.
- ◆ Designed for a maximum allowing working pressure of 150 psi.
- ◆ Visual indication of exact setpoint temperature as well as fault conditions provides you with instant feedback.
- ◆ Electronic leak detection system notifies user in the event of an internal water leak.
- ◆ Factory packaged resettable circuit breakers instead of a one-shot fuse will lower your down-time.
- ◆ Environmentally friendly CFC/HCFC free closed cell foam insulation minimizes tank heat loss for maximum operating efficiency and reduced operating costs.
