

Perfect for your Appetizers and Entrees

Withstands Oil Heated to 302°F, and Water Heated to 212°F

These trays are a great alternative for your establishment! Place food directly on this eco-friendly tray, or use it to hold individual appetizer, entree, and dessert plates. Non-toxic, biodegradable, and compostable, these trays are made of sugarcane and will break down to help reduce landfill waste. Not only are they great for the environment, but they will help to give your establishment a positive image as well! Use these renewable resource products and please both Mother Nature and your customers by helping to preserve the environment for future generations!
