## Low Temperature Rinse Aid

SparClean Low Temperature Rinse Aid is specially formulated to ensure superior water sheeting and drying of dishware and utensils in low temperature dish machines. The non-foaming formula will help maintain the machine's spray arm efficiency, providing optimal wash conditions for each rack. SparClean Low Temperature Rinse Aid is ideally suited for use in conjunction with a chlorinated sanitizer. SparClean Low Temperature Rinse Aid can also be used in high temperature machines.

#### COLOR AND NUMBER SYSTEM:

Each SparClean product is color and number coded for easy product identification. All product references and labels reflect this color and number, making training short and simple.

#### PACKAGING:

All SparClean products are packaged in translucent 5-gallon pails and gallons. The clear packaging allows you to see exactly what remains in your container and enables timely reorder of your warewash products. Low Temperature Rinse Aid is also packaged in a closed system gallon to reduce possibility of contact with product.

#### SUPPORT ACCESSORIES:

Several dispensing options are available to complement the SparClean warewash line of products. We will also smooth your transition with training materials such as a general application SparClean Warewash Wall Chart.

#### DIRECTIONS FOR USE:

##### DO NOT MIX WITH OTHER CHEMICALS

Some individuals may be sensitive to ingredients in this product. Please read product label and MSD sheet before use. SparClean Low Temperature Rinse Aid is not intended for manual washing.

1. Set the dispenser according to the manufacturer's instructions to dispense SparClean Low Temperature Rinse Aid during the rinse cycle.
2. Dose SparClean Low Temperature Rinse Aid at 2 – 5 ml per rack of dishes.
  - a. Run several test racks to check for proper sheeting and drying of dishes. If sheeting and drying is not sufficient, increase dosage by 1 ml per rack until sufficient sheeting action is achieved.
  - b. For hard water situations an increase dosage of SparClean Low Temperature Rinse Aid may be needed.
  - c. Overdosing SparClean Low Temperature Rinse Aid can lead to decreased sprayer arm efficiency which can lead to poor results and is not recommended.

When using SparClean Low Temperature Rinse Aid in a low temperature machine, ensure that 50 - 150 ppm of a chlorinated sanitizer is also being used during the rinse cycle. When using in a High Temperature Dish Machine, a minimum rinse water temperature of 180 °F must be maintained during the rinse cycle for proper thermal sanitization.

**Be sure to read all Directions, Precautionary and First Aid Statements on product labels before use of this or any Spartan product. Material Safety Data Sheets for all Spartan products are available from your authorized Spartan distributor or at [www.spartanchemical.com](http://www.spartanchemical.com).**

#### SPECIFICATION DATA:

pH – 8.0-9.0

Color – Blue

Stability -

- a. Shelf – One year minimum @ 24°C/75°F
- b. Accelerated – 30 days minimum @ 49°C/120°F
- c. Freeze/Thaw – Can withstand three freeze/thaw cycles

Phosphate free

EDTA free

Contains biodegradable components

Each SparClean product is formulated to comply with various regulations. Consult Spartan's Letter of Guaranty for specifics.
